Digital Transformation & Strategy

As digital technology becomes more pervasive and companies move further in the journey of digital transformation. Forah technology helps businesses with digital strategies focused on improving business performance, creating new competitive advantages, making it possible for innovative companies to provide services that weren't previously possible.

Cloud Computing

We take a big shift from the traditional way businesses think about IT resources by aiding your business into the cloud computing era which eliminates capital expenses, increases speed, global scale, enhances productivity, improves performance, better reliability and enhanced security. We provide businesses with services on cloud platforms ranging from IaaS, PaaS, Serverless and SaaS.

Process Automation

Reducing operational expenditure by 30% and improving efficiency by 50% for your business by simply automating daily, mundane & repetitive tasks.

AI/MI Powered Solutions

Moving business towards greater success by providing machine learning and artificial intelligence tools to uncover insights for more informed decisions.

Virtual Desktop In the Cloud

Working remotely and Bring your own device (BYOD) have been made easy, efficient and secured with virtual desktop in the cloud solutions. We help businesses migrate their workload (Desktop and Applications) to the cloud seamlessly.

Software & Mobile App Development

Keeping your business requirement in mind, we deliver custom software and mobile app development for Large companies, SMEs, Start-Ups and even individuals. Crafting the perfect user experience through innovative, secured, responsive and intuitive designs.

Ideas & Innovation = Brilliant Apps Delivered

❖ Enterprise applications

❖ ERP

❖ CRM | Inventory management | Accounting software

❖ HR Software

❖ eLearning Software | School Website | School management software

❖ eCommerce | Retail

❖ Visitor management software

❖ Collaboration and productivity solution

❖ Fleet management software

❖ Data Analytics

❖ Web portal

❖ Blockchain

❖ Church database management system | Live Streaming

❖ Bespoke Apps
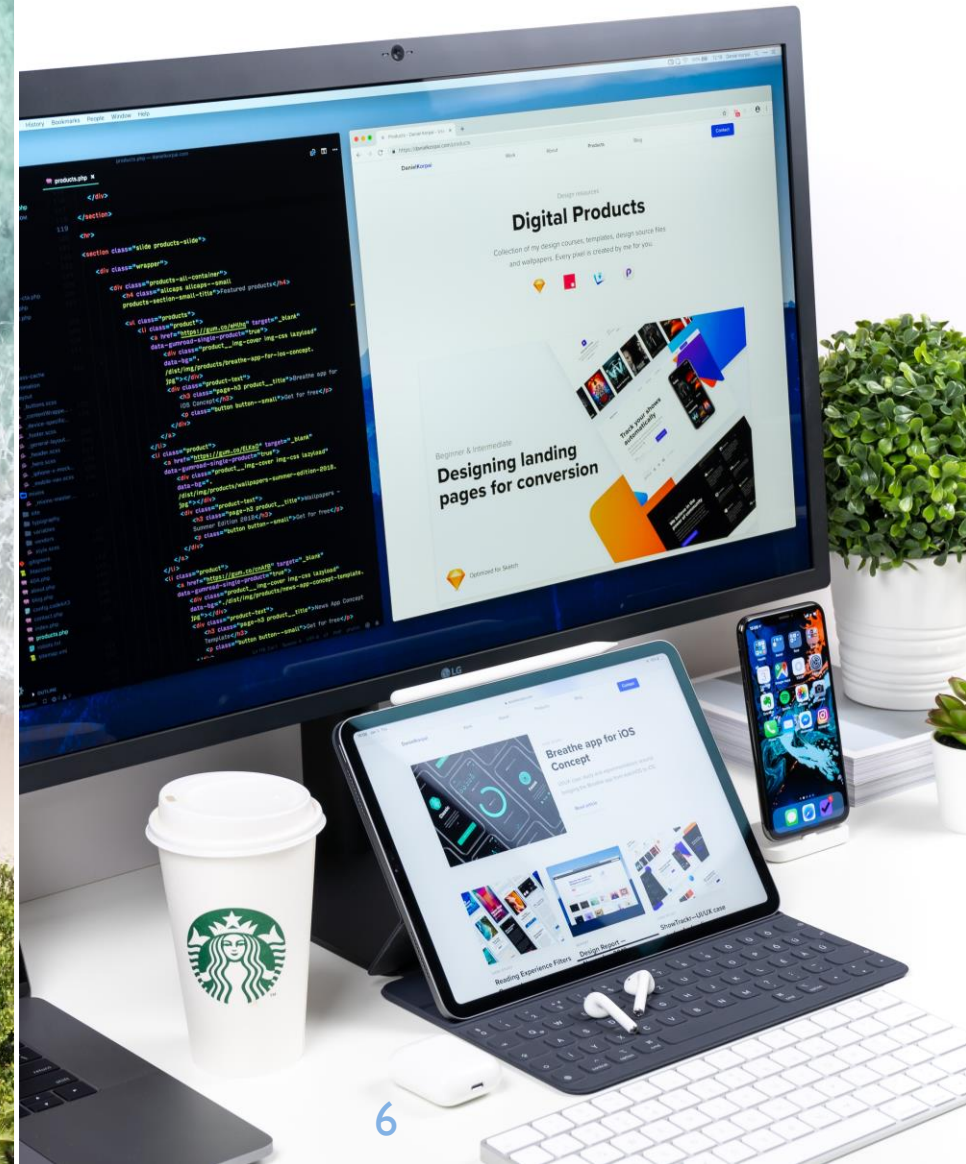

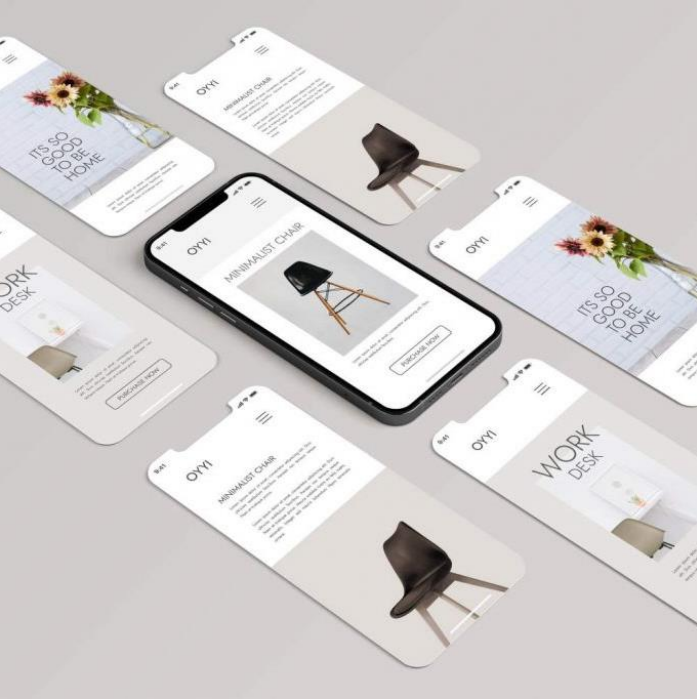

Bespoke Web App, Desktop App and Websites
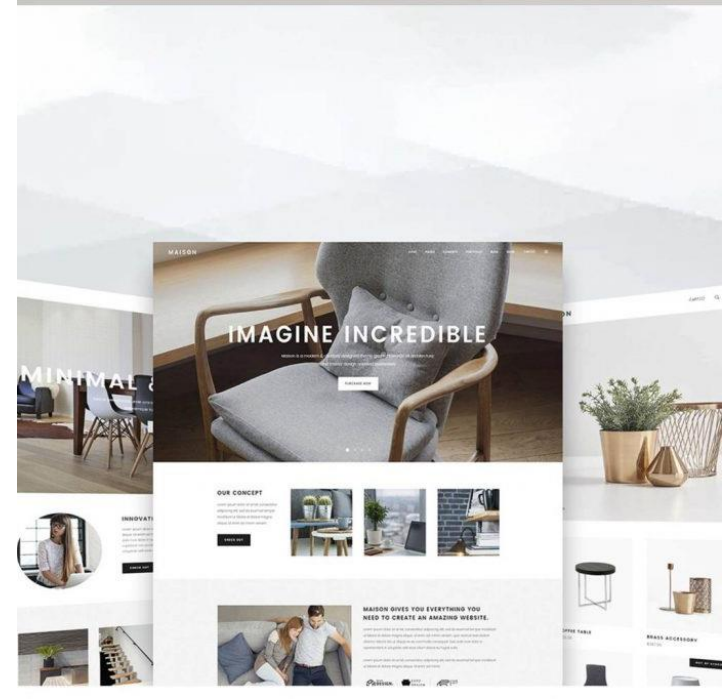

We help our clients turn their ideas and vision into reality. These start from nothing but an idea and develop into a professional, user friendly application. With bespoke applications, you will be able to customize every little detail – features that are not found in an average software.

API-Driven Web Apps

We leverage APIs not just as a tool for helping to build applications, but also as the very foundation of your entire development strategy. API driven development is cloud-friendly because it integrates easily with external applications and resources in the cloud.

Scalable Mobile Apps

Domain specific Apps, Enterprise mobile Apps, App upgrades & App updates. From customer facing apps to internal organization level apps, we help you launch apps rapidly & affordably ensuring apps are regularly updated & upgraded to keep them relevant and always engaging.

forah technology

Enterprise Solution

Strengthen your enterprise ICT infrastructure with the latest range of products and solutions giving your business the cutting-edge.

We partner with various OEMs to help you embrace flexible working through innovative products and solutions.

We offer various ranges of ICT products and solutions that are secured, rapid, reliable, robust and of course ROI.

Improved Infrastructure = Competitive Advantage

- ❖ Servers-Computing
- ❖ Data Storage
- ❖ Enterprise Networking
- ❖ Enterprise wireless
- ❖ Virtualization
- ❖ Intelligent voice recording
- ❖ Identity
- ❖ Security
- ❖ Intelligent collaboration
- ❖ Business Continuity
- ❖ Disaster recovery
- ❖ Intelligent video & Data Analytic
- ❖ Management system
- ❖ Electronic document management system

IoT SOLUTIONS

Connect everything with IoT development let us work together to integrate the physical and digital worlds for a connected future.

Unlock the value of a connected ecosystem with our custom IoT solutions for various industries.

Automotive

We offer custom connected vehicles and telematics solutions for the automotive industry to help them chalk out and deliver the most effective connected vehicle experience.

- ❖ Fleet tracking & management
- ❖ Driver safety solutions
- ❖ Remote diagnostics and maintenance alerts
- ❖ Infotainment solutions

Healthcare

We offer IoT development services for the digital healthcare industry to enhance patient care, elevate provider productivity and enable start-ups to bring connected medical devices and wearables into the market.

- ❖ Remote patient monitoring
- ❖ Connected medical devices and wearables development
- ❖ Smarter care coordination
- ❖ Hospital asset management

Smart Home & Workplace

We offer companion app development for smart devices like air conditioners, lights, speakers, etc., to accelerate device automation technology in both homes and offices.

- ❖ Device control mobile apps
- ❖ Voice apps for popular assistant platforms
- ❖ Device data collection, management and analytics

Retail

Deliver connected retail experiences with retail IoT solutions by Forah Tech. We enable you to leverage sensors like beacons to create a more compelling in-store shopping experience.

- ❖ Interactive digital signage screens
- ❖ Connected mobile shopping applications
- ❖ Sensor-based asset tracking
- ❖ Beacon-powered apps.

IoT
SOLUTIONS

Connect everything with IoT development let us work together to integrate the physical and digital worlds for a connected future.
Unlock the value of a connected ecosystem with our custom IoT solutions for various industries.

Manufacturing

We can enable manufacturers to realize digital transformation by tapping into the data generated across the manufacturing value chain through the power of connected things.

❖ Production asset management and maintenance
❖ Manufacturing operations management
❖ Field services optimization
❖ Access control and safety solutions

Energy

Leverage IoT systems to manage energy distribution with real-time precision, build energy efficient building systems, offer smart lighting solutions and so much more.

❖ Smart building energy management
Smart lighting
❖ Fault detection
❖ Connected heating and air conditioning systems
❖ Smart metering solutions

forah
technology

Energy Management & Efficiency

Our affordable energy asset monitoring solution empowers organizations and individuals to maintain control and possession over site's fuel/diesel by actively tracking fuel/diesel levels, deploying live alerts on potential thefts or excess usage, and establishing organization-wide limits on expected fuel use applicable to both residential and commercial buildings.

Energy Solutions

Operational Cost Saving

Our remote monitoring and management solution provides the information you need to maximize energy efficiency and reduce wasteful energy use at your site. Our software can adjust energy use to reduce fuel costs and refuelling frequency by understanding operating behaviour such as peak and idle times.
